

## Library Resources for the Guidebook Final Report

### 1. For books, use Worldcat

<https://libraries.indiana.edu/resources/worldcat>

Put the name of the park in the first search box, and the word “geology” in the second search box.

The screenshot shows the WorldCat search page. At the top, there are links for Subjects, News, and Help, and a note that the current database is WorldCat. The search section has a 'Search in database:' dropdown set to 'WorldCat' (updated 2015-10-09) and a description: 'OCLC catalog of books and other materials in libraries worldwide'. Below this, there are three search boxes. The first box contains 'pictured rocks national lakeshore' and is annotated with a red line and the text 'Enter name of the park'. The second box contains 'geology' and is annotated with a red line and the text 'Enter the word geology'. The third box is empty. Each search box has a 'Keyword' label and a search button.

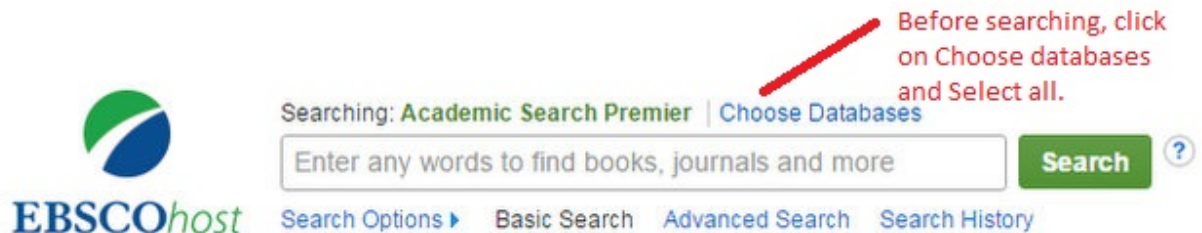

After browsing the search results, select the book you want. Click the IU-Link icon to see if we have it in our library. If we don't have it, use the interlibrary loan service to request it from other libraries. It may take a week or two weeks for us to get the books from other libraries.

The screenshot shows the WorldCat record for the book 'Geology and landscape of Michigan's Pictured Rocks National Lakeshore' by William L. Blewett, published in 2012. The record includes a cover image, the title, author, year, language (English), and format (Internet Resource, Computer File). It also lists the number of illustrations (181) and the publisher (Wayne State University Press). Below the record, there are links for 'GET THIS ITEM' and 'FIND RELATED'. The 'GET THIS ITEM' section includes an 'Access' link, an 'Availability' section with a link to 'Check the catalogs in your library', and an 'External Resources' section with links to 'Request materials from ILL', 'IU-Link', 'IU-Link - Check for availability', 'Find this item at Biblio (Bookseller)', and 'Cite This Item'. The 'FIND RELATED' section includes a link to 'More Like This: Search for versions with same title and author | Advanced options...'. The title is highlighted in yellow. A red line points from the 'IU-Link - Check for availability' link to a red text box that says 'Click IU-Link to see if we own the book. If we don't, use the interlibrary loan service to request it from other libraries.'

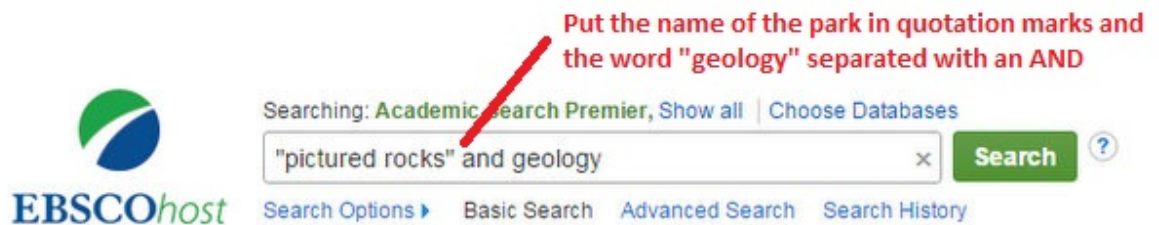

## 2. For journal articles, use EBSCO.

<https://libraries.indiana.edu/resources/academicsearch>

Before searching, make sure you choose all databases.

Put name of the park in quotes, and combine the word "geology" with AND

AND is important here.

Browse the search results. Some of the articles have fulltext already. Use IU-Link to find out if we have the fulltext in other databases. If we don't have then, use the Interlibrary Loan service to request articles from other libraries. Again, it may take a few days for us to get the articles from other libraries.

**3. For internet resources, use Google Scholar**

<https://libraries.indiana.edu/resources/googlescholar>

Put the name of the park in quotes. And the word “geology”. You may try other keywords, such as guidebook, “field trip”, together with the name of the park and “geology.”

**4. For properly reference resources, use**

The Online Writing Lab (OWL) at Purdue University  
<https://owl.english.purdue.edu/owl/>

**5. Contact me if you need assistance**

Jian Liu  
Librarian for the Geosciences Department  
Office: GY317 (I am usually in on Tuesday, Thursday and Friday mornings
