

## 5. Elinks

---

Elinks is a free text-based web browser for Unix and Unix based System. Elinks support HTTP, HTTP Cookies and also support browsing script in **Perl** and **Ruby**. Tab based browsing is well supported. The best thing is that it supports Mouse, Display Colours and support a number of Protocols like HTTP, FTP, SMB, Ipv4 and Ipv6.

### Installation of Elinks

---

By default elinks also available in most of the Linux distributions. If not, install it via **apt** or **yum**.

```
# apt-get install elinks      (on APT based System)
```

```
# yum install elinks          (on YUM based System)
```

### Basic Usage of Elinks

---

```
# elinks www.tecmint.com
```
